

CS 7120 Fruit and Vegetable Wash

Highland Fresh Technologies introduces CS 7120, an improved cleaner for use in washing fresh produce

Benefits

- Enhanced cleaning of produce surfaces
- High dilution rate reduces cost
- Minimizes nozzle clogging
- Can be used alone or in conjunction with Selectocide® sanitizer in the washing process
- Improved foaming action in brush washing applications
- Easily rinsed from the fruit surface

Principle Use

CS 7120 should be used in washing of fresh fruits and vegetables. It is formulated to penetrate and lift soils and enhance the brush washing process for hard to clean commodities that have direct contact with soil in the field. It can be used alone or in combination with Selectocide sanitizer.

Directions

Dilute CS 7120 with water according to specific application requirements. Typical use rates are 1-2 ounces per gallon of water. Ensure full coverage. CS 7120 enhances surface cleaning during the brush washing process. Rinse produce with potable water after application.
