

Highland Fresh Technologies features Perasan® A

EPA registered for use in multiple agricultural applications

Highland Fresh Technologies is pleased to offer Perasan® A, a stabilized peracetic acid plus hydrogen peroxide sanitizer, for use in a variety of agricultural applications.

- ✓ To control bioslime and algae in irrigation systems
- ✓ To control algae in greenhouse applications
- ✓ To kill food borne pathogens such as Listeria, E. coli, and Salmonella on food contact surfaces
- ✓ To control spoilage organisms in washing raw fruits and vegetables
- ✓ No rinse required when applied to food contact surfaces or in washing raw fruits and vegetables
- ✓ OMRI certified for use in organic production
- ✓ Effective up to pH 9.5; no expensive equipment or additional products required to buffer pH
- ✓ Does not produce undesirable byproducts or residuals; does not load tanks or discharge water with salts, THMs, or halogenated byproducts
- ✓ Effective in hard water
- ✓ Reduces mineral deposits and nozzle clogging

Perasan® A is available in 5 gallon containers, drums, and totes. Contact Highland Fresh Technologies to learn more about using Perasan® A to conquer microbial challenges throughout your operation!
